Exam Description

The ICND exam is one oft he two qualifying exams available to candidates pursuing a two-exam option for the Cisco Certified Network Associate CCNA certification. The ICND (640-811) exam will test materials from the new Interconnecting Cisco Network Devices (ICND) course. The exam will certify that the successful candidate has important knowledge and skills necessary to select, connect, configure, and troubleshoott he various Cisco networking devices. The exam covers topics on Extending Switched Networks with VLANS, Determining IP Routes, Managing IP traffic with Access Lists, Establishing Point-to-Point connections, and Establishing Frame Relay Connections.

Exam Topics

The following information provides general guidelines for the content likely to be included on the exam. However, other related topics may also appear on any specific delivery of the exam. In order to better reflect the contents of the exam and for clarity purposes the guidelines below may change at any time without notice.

Planning and Designing

- Design or modify a simple LAN using Cisco products
- Design an IP addressing scheme to support lassful, classless, and private addressing to meet design requirements
- · Select an appropriate routing protocol based on user requirements
- · Design a simple internetwork using Cisco products
- · Develop an access listt o meet user specifications
- Choose WAN protocols to meet design requirements

Implementation and Operations

- Perform an initial configuration on a switch
- Configure routing protocols given user requirements

- Configure IP addresses,s ubnet masks, and gateway addresses on routers and hosts
- · Configure a router for additional administrative functionality
- · Configure a switch with VLANS and inter-switch communication
- Implementa LAN
- Customize a switch configuration to meet specified network requirements
- Implementa ccess lists
- Implements imple WAN protocols

Troubleshooting

- Utilize the OSI model as a guide for systematic network troubleshooting
- · Perform LAN and VLAN troubleshooting
- Troubleshoot routing protocols
- · Troubleshoot IP addressing and host configuration
- Troubleshoot a device as part of a working network
- Troubleshoot an access list
- · Perform simple WAN troubleshooting

Technology

- Describe the Spanning Tree process
- Evaluate the characteristics of LAN environments
- Evaluate the characteristics of outing protocols
- Evaluate rules for packet control
- Evaluate key characteristics of HDLC, PPP, Frame Relay, DDR, and ISDN technologies

Recommended Training

Interconnecting Cisco Networking Devices (ICND) is the recommended training for this exam.

Courses listed are offered by Cisco Learning Partners, the only authoriz d source for Cisco IT training delivered exclusively by Certified Cisco Instructors. Check the <u>Global Learning Partner Locator</u> for a Cisco Learning Partner near you.

Additional Resources

A variety of Cisco Press titles may be available for this exam. These titles can be purchased through the <u>Cisco Marketplace Bookstore</u>, directly from Cisco Press.
